JUNE 20, 1991

GRAPHIC DESIGNER / WEB DESIGNER

## ABOUT ME

My main specialization (and my professional passion) is logo design and brand identity. I work not only with the technical side of the issue, but also with ideas. I am convinced that a perfect identity should be filled with meaning – I find it and put it into a laconic and easy-to-understand form.

I also specialize in website and mobile application design. I know how to find a balance between the wishes of clients and the laws of composition, typography, visual hierarchy, convenience and «lightness» of web pages.
