Summary

JavaScript developer with experience in building quality web applications using such technologies as Vanilla JS, Typescript, React, Angular, Node JS, MongoDB and PostgreSQL. Worked with Node.js Express/Nest Frameworks to build self-documenting REST API servers. Have some experience in building CLI tools with Node JS. Have strong knowledge of HTML/CSS, responsive/flexible layouts, tools and frameworks like Bootstrap, Material UI etc. Experienced in setting up Linux based servers and app deploy procedures using Docker-based tools. Responsible and attentive to details. Always open to learning new skills.

Experience

React Developer

EPAM Systems

Dec 2021 - Feb 2022 (3 months)
React/Frontend Developer on Charity Project.

Responsibilities:
• Creating UI items from Figma mockups
• Taking part in code organizing and refactoring, writing unit-tests
• Separate existing components to reusable ones
• Implement user roles/access rules management
• Participating in Scrum process ceremonies

JavaScript Developer

Freelance

Feb 2021 - Dec 2021 (11 months)
Some responsibilities:
- Creating new UI components from Figma mockups.
- Building and improving functionality of existing web interfaces using vanilla JavaScript / React.JS / Angular, as well as basic web technologies like HTML and CSS.
- REST APIs creation using Express Framework with MongoDB integration.
- Typescript was used and NX.dev tool for the development process in some tasks.
- Additionally, I improved my expertise in using Docker for the NodeJS apps deployment process.

Javascript Developer

EPAM Systems

Sep 2021 - Dec 2021 (4 months)
Trainee Javascript Developer on different educational projects in Javascript/React/Angular/Node.js stack. For example:
• creating different UI items;
• fetching data from 3d party API;

• user signup/signin process with Firebase;
• implemented different API endpoints for interacting with user on a role basis, JWT generation and bcrypt password hashing with self documenting to Swagger Doc;
• configured logging, error handling and data validation schemas of requests through middleware;
• exporting app state to external file (Excel).

Javascript Developer
The Rolling Scopes School
Aug 2020 - Feb 2021 (7 months)
HTML/CSS/JS/Typescript/React skills raised while different practical tasks completed.
