Adobe Photoshop Adobe After Effects Adobe Illustrator Adobe Premier Pro Adobe Animate
Blender

Additional Information

About me

Before the war, I worked on a freelance basis with arbitration advertising agencies from Russia. After February 24, I cut off all working contacts, as I realized that every order completed for a Russian company is taxes that go to kill me. However, this does not negate all the work experience that I received.

Working with agencies allowed me to study and master a lot of areas in advertising: delivery services, mobile games, carsharing, beauty sphere and other. Creative design for social media is my forte. Static banners of all sizes and complexity, motion videos for social networks - I can do it all.

Ukraine will win.
