

# YEVHEN POPTSOV

## ELECTRICAL INSTALLATION

### ABOUT ME

I like to work in a team, to be creative in solving problems. I prefer constructive, intelligent discussions with colleagues, to participate in the initial stages of the project, to get a clear idea of the scope and direction of the tasks. I perform best when I am allowed to use my own ingenuity and competence. I feel comfortable when I feel peace, friendliness, warmth and hospitality. I want to work in an atmosphere where the exchange of creative ideas, support for discussions and joint decision-making are paramount.
