I'm a developer of MS Dynamics 365F&O systems with almost 2 years of experience in designing, programming and implementing solutions within Azure technologies. Proficient in Python language and a good understanding of Django & REST framework., with a basic understanding of Artificial Intelligence and Machine Learning concepts. I'm seeking for a challenging position where I fulfill myself in Python development field.

EXPERIENCE

2022- ANEGIS Sp. z o.o.

2024

Junior Developer

- Analysis of requirements
- Designing functionalities
- Fixing errors and software bugs
- Source code optimisation

EDUCATION

2026- Wroclaw University of Banking

2024

Computer Science

Artificial Intelligence and Machine Learning

Master's degree

2024- University of Science and Technology in Wroclaw

2020

Microsystems Mechatronics Engineering

Automatics, Electronics, electrical engineering and space technologies

Engineer's degree

PROJECTS

2022- Internal company projects

2024

- Executing programming tasks for functionality implementation according to requirements outlined in documentation
- Source code optimisation
- Environment configuration (Lifecycle Services)

2023 Implementing D365F&O system for a client– BBK S.A

- Designing new and extending existing functionalities of D365F&O system according to requirements outlined in documentation
- Source code optimisation

2023- Engineering thesis

2024

- GUI application for comparative analysis of selected machine learning algorithms using the OpenCV library and programming languages C++ and Python

CERTIFICATES

- Microsoft DP-420

FOREIGN LANGUAGES

- English: B2+/C1

SKILLS

- Python
- Django & REST framework
- GIT
- MS SQL Server
- Basic concepts of AI&ML
- Version control systems GIT, TFVC)
- Agile (Scrum)
- D365F&O development
- Azure DevOps
- MS Office

HOBBY

- Biking
- Computer games (strategy, RPG, MMORPG, logic, Co-Op)
