Work experience

Data Collection and Quality Analysis at CASAFARI (Real Estate, Lisbon) from October 2021 to June 2024:

It's worth starting with the fact that this was my first job and thanks to it I discovered that I wanted to do data analysis. For over a year and a half I was in the Data Collection team, where I was basically collecting data from different websites and then analyzing it for any defects or inconsistencies with our QA rules. The next year, I shifted my focus from Data Collection and Quality Analysis to Data Analysis as I started solving more global problems where I had to analyze large amounts of data (millions of data, such as phone numbers, prices, areas...), build various dashboards, and visualize datasets to help the rest of the team see the big picture of our work. During this time I got to know SQL to a good level, learned how to use Apache Superset as one of the main data sources, and use Looker not only to search and visualize big data, but also to create useful new sets and datasets. I am also using a little bit of Grafana, as I have used the pre-built tables and presets for analyses. And for the last six months I was able to be a manager of a small team, 4-5 people, where I also had to use various tools and metrics to monitor the performance of the team and to detect errors in the data in time to get ahead before the clients do. I often take a rational approach to the tasks I'm given and try to find a solution that works for everyone and solves the problem not just once, but for many months to come.

Tech skills:

- SQL
- Power BI
- Apache Superset
- Looker (exploring and visualization)
- Excel / Google Sheets

Analytic skills:

- Collection and processing of data of different sizes
- Finding errors and patterns to make operations faster
- Ability to find quick solutions
- Increasing the efficiency of analytical processes through automation and optimization
- Development and presentation of reports with key metrics

About me:

I am a lively and ambitious person who fully dives into any work. I am passionate about photography, especially vintage cameras, and I dream of visiting all the countries of Europe. My ability to easily find common language with others helps me to work successfully in a team and build strong relationships.
